

Production fasteners:

As a general rule, the parts are produced attached on the plate.

For more information on the type of fasteners possible, please refer to our technical guide available on our website under www.cmtrickenbach.com/Technologies-2/Photochemical-machining

- Defined by CMT Rickenbach SA
- Internal
- External
- Without fastener (available on request and at an additional production cost)

Position of production fasteners:

- Defined by CMT Rickenbach SA
- Specified on the drawing

Rolling direction:

- Defined by CMT Rickenbach SA
- Specified on the drawing

Delivery of parts:

- Defined by CMT Rickenbach SA
- Attached to the plate
- Detached
- Specific packaging:
- Specific transport:

Required documents:

- Certificate of conformity
- FAI/PAQP
- Certificate of Material
- Other:

Type of Control

- Defined by CMT Rickenbach
- Other:

Type of finish requested:

- Galvanic treatment
- Selective galvanic treatment
- Bending
- Welding
- Mechanical decoration
- Polishing
- Tribo-finishing
- Sanding, bead blasting
- Identification (Marking)
- Epilage
- Galvanic treatment Specified on the drawing
- Other:

Standard applicable to the production of your parts:

- ISO9001
- EN9100 (on demand)

Note:

Thank you for this information and we will prepare our offer according to your specifications, subject to feasibility.

Best regards
